NPIC/TSSG/RED-1813-69
19 September 1969

MEMORANDUM FOR: Chief, Technical Services & Support Group, NPIC

ATTENTION : Executive Officer, Technical Services & Support Group

SUBJECT : LDX Requirements

1. The Research & Engineering Division has reviewed their potential requirements for the utilization of the LDX services outlined in the CIA Operations Center memo of 11 September 1969. At this time, we do not have a justifiable requirement to support installing a LDX link between NPIC and the CIA Operations Center.

2. However, if a LDX link is installed in the Center, RED would have occasion to make effective use of it. This use would largely be for communicating with [redacted] at the Pentagon and DDS&T at Langley, if security restrictions permit, or for sending approval or budget papers to the DDI area. Under these circumstances, it is anticipated the average volume would not exceed 100 pages a month.

Chief, Research & Engineering Division,
TSSG
